Looking for the role of a developer where I can contribute my analytical skills and knowledge acquired by pursuing my degree in computer science. Also Looking for a dynamic and progressive company where my skills are utilized in the best way.

Achievements

Supervised Machine Learning: Regression and Classification

- **Organization:** Coursera
- **Credential URL:** <https://www.coursera.org/account/accomplishments/certificate/UN6YQMV2C48K>
- **Issue Date :** April, 2023

Projects

AYT-Furniture (MERN)

Developer

- A Website on the Furniture Product with various modern features.
- We Used ReactJs as Frontend and ExpressJs/MongoDB as Backend to build that Site

<https://final-project-server-rho.vercel.app>

<https://github.com/abid211051/Final-Project-client>
<https://github.com/abid211051/Final-Project-server>

Snake Game (Python)

Developer

- A Simple Console game with Most popular python Library PyGame.
- Though it was a console project, But we added Grapical Interface for better user Experience. We also worked with file system to Save current and Highest score.

Realtime Weather App (API)

Developer

- This Project was developed by raw JavaScript.
- Here I used Realtime Weather API with JS to build this Site. Main Focus on this project was to work with API data handling. For a extra challenge I used Three theme for three different day cycle(Morning, Afternoon, Night).
